High-Speed Internet Services

Do you demand high-speed, scalability, security and quick deployment?

Residential Installation

Wireless Broadband

CresComm's Fixed Wireless Broadband is the cutting edge of Internet service for your home or business without the need for telephone wires or modem connections. Wireless is fast, secure and reliable beating DSL or cable services hands down.

Getting Started

CresComm's Fixed Wireless requires that you be located within ten miles and in line-of-site with one of our wireless towers in Joyce, or Port Angeles.

Need more bandwidth? Ask about a Commercial plan.

Getting Started (cont.)

Line-of-site limitations can often be overcome with strategically placed repeater antennae. After we qualify your location for Wireless service, you can be up and running in as little as seven to ten business days.

Wireless Pricing

When compared to other broadband Internet services, CresComm's Wireless service is affordable. One setup fee covers all necessary hardware, software, and professional installation at your home or business.

Commercial Installation
